

SPACE SYMPOSIUM COLORADO SPRINGS

April 7-10
2025

THE FRENCH TEAM
& THE FRENCH BOOTH

SPACE SYMPOSIUM COLORADO SPRINGS

Meet the
French Team

WELCOME WORDS

Cooperation is a key pillar of our journey to space, in a fast-moving ecosystem where competition is today the name of the game.

Through our joint efforts to develop the space ecosystem, CNES and the French ecosystem have always been core international players, be it in access to space, Earth observation, telecommunications, cybersecurity or exploration. Our partner companies on this French booth are pursuing this trend and achieving major new milestones every day. Whether long-established or emerging players, they stand at the forefront of innovation in all areas of space, maintaining and developing key partnerships across the globe, notably across the Atlantic with their American counterparts, spanning projects across civil, military and commercial domains.

Animating the French Team as CEO of our national agency, CNES, I am proud to present the expertise our French stakeholders, companies and start-ups have developed.

Along with our ecosystem that you'll discover in these pages, we are eager to foster new initiatives and move forward together towards innovation, technology development, science, exploration and national security projects. This digital brochure, presenting the panoply of French expertise at this 40th Space Symposium, showcases the diversity, quality, and ingeniousness of French space players, as well as the partnership and collaboration opportunities they offer.

While international cooperation shall remain the inspiration of our space activities, France and its ecosystem will maintain their momentum driving our global efforts, federating and paving the way for future innovations.

Lionel Suchet

Chief Executive Officer of CNES

WELCOME WORDS

I am particularly pleased that **CNES** is leading the French Team at the Space Symposium for the third year running, with our public and private partners.

More than 40 French space stakeholders will be showcasing their expertise on the France booth, including numerous incumbent players and start-ups supported through our Connect by CNES program. This key initiative driving development of the French space ecosystem is also accompanying and federating the space user community beyond our borders, in Europe and around the world.

Throughout this week, the France booth will be a great place to discover our top-tier ecosystem, which is eager to pursue its expansion on the international stage.

Jean-Marc Astorg
Strategy Director of CNES

Networking events

PROGRAM ON THE BOOTH 403

Tuesday 8th April
noon–1 PM

MEET THE FRENCH TEAM

Networking cocktail

Speakers : Laurent Bili Ambassador of France to the United States, Lionel Suchet CEO of CNES and Jean-Marc Astorg Strategy Director of CNES

Wednesday 9th April
9–10 AM

MEET THE FRENCH INDUSTRY

Café Croissants

Special guests : Japanese delegation

Speakers : Koji Ina Manager, Strategic Planning Division, Space Strategy Fund Department – Manager Business Development and Industrial Relations Department) of the Japan Aerospace Exploration Agency (JAXA) and Jean-Marc Astorg Strategy Director of CNES

Thursday 10th April
9–10 AM

MEET THE FRENCH INDUSTRY

Café Croissants

Compagnies pitches on the topic “Action in space and Space Situational Awareness”

43 public and private stakeholders to showcase their expertises and innovative offers.

Join us on the french booth 403 to discover our top-tier ecosystem. All the team is eager to meet you!

© Christophe Ortega

MEET
THE
FRENCH
TEAM

THE MEMBERS

CNES

Founded in 1961, CNES is a programmatic agency, field centre and space operator encompassing all of the functions required to shape and execute the French government's space strategy, and to deploy public policies that rely on the space sector.

<https://cnes.fr/en>

ARIANE GROUP

Pioneering the European way to space, for people's well-being and security.

<https://ariane.group/en/>

NEWSPACE FACTORY BY AEROSPACE VALLEY

The NewSpace Factory, 50 years of success at the service of the NewSpace.

<https://www.aerospace-valley.com/en>

COMAT MEMBER OF NEWSPACE FACTORY

Accurate and reliable space mechanism, compact and light deployable system.

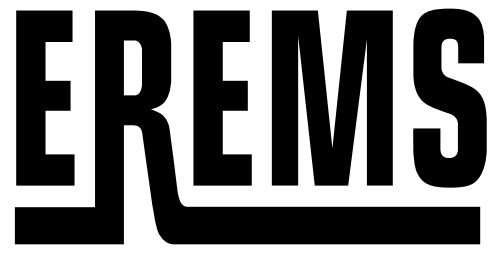

<https://comat.space/>

CS GROUP MEMBER OF NEWSPACE FACTORY

Developing, integrating and operating critical software for all your space operations.

<https://www.cs-soprasteria.com/en/strategic-sectors/space/>

EREMS
MEMBER OF NEWSPACE FACTORY

Global Solution for your flight electronic equipment.

<https://www.erems.fr/en/>

HEMERIA
MEMBER OF NEWSPACE FACTORY

To infinity and beyond! HEMERIA, your trusted and flight-proven industrial partner for successful space missions, from design to in-orbit operations.

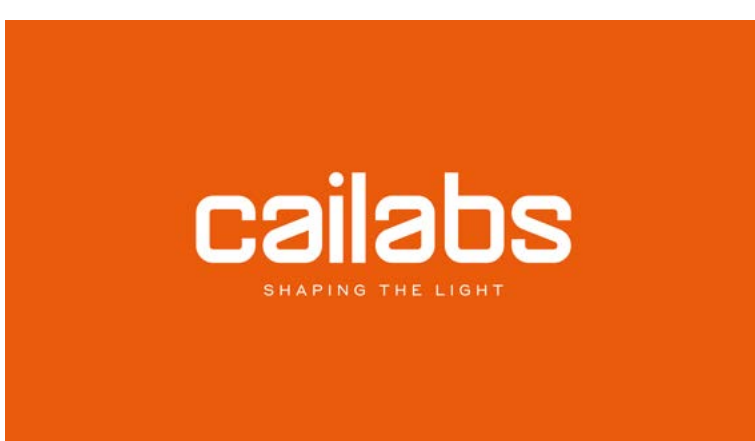

<https://www.hemeria-group.com/en/>

SYNTONY GNSS
MEMBER OF NEWSPACE FACTORY

From underground to space, we provide SDR GNSS simulation (RF signal generation) and reception for resilient PNT (positioning, navigation & timing).

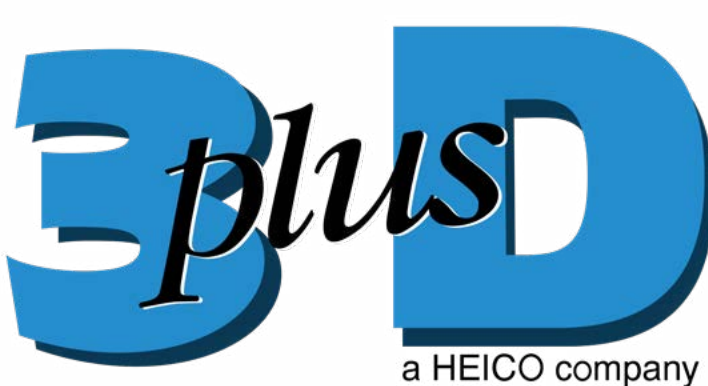

<https://syntony-gnss.com/>

CAILABS

10+ Gbps Atmospheric Laser Communications delivered with Cailabs turnkey optical ground station enabled by atmospheric turbulence compensation technology.

<http://cailabs.com>

3D PLUS

3D PLUS is a radiation tolerant components manufacturer for space applications.

<https://www.3d-plus.com/>

3IPK

Securing Data Authenticity, Integrity & Traceability through Blockchain Technology.

<https://3ipk.com/>

AIKO

AIKO specializes in Artificial Intelligence and Automation solutions for both ground and in-orbit space operations.

<http://aikospace.com/>

AIR LIQUIDE ADVANCED TECHNOLOGIES

60 years of successful service to the space odyssey.

<https://advancedtech.airliquide.com/fr>

ALDORIA

Securing space, protecting satellites, empowering sovereignty.

<https://www.aldoria.com/>

AUBERT & DUVAL

Metallurgical solutions from hottest to coldest environment.

<https://www.aubertduval.com/en/>

BERTIN TECHNOLOGIES

BertinTechnologies designs and manufactures equipment for critical and scientific applications, specialising in measurement, observation and detection.

<https://www.bertin-technologies.com/>

BUSINESS FRANCE

The national agency supporting the international development of the French economy.

<https://www.businessfrance.fr/>

FRENCH SPACE COMMAND

The French Space Command : delivering space effects to the warfighters on earth, protecting and defending French interests in orbit.

<https://www.defense.gouv.fr/en/cde>

CYSEC

Secure and enhance your space communications with cutting-edge encryption, VPN, and confidential computing technologies.

<https://www.cysec.com/>

DACTEM INTERNATIONAL

As experts in the validation of electric propulsion and on-board solutions, we design innovative test and measurement equipment adapted to various environments, guaranteeing optimal performance and reliability.

<http://www.dactem.com/>

EVIDEN

Advanced Satellite Tracking and Monitoring: Signal Intelligence for Boosting National Security.

<https://eviden.com/solutions/digital-security/satellite-payload-monitoring/>

EXENS GROUP

EXENS Group innovates, designs, produces RF & Microwave multi-technologies from component to complete systems in harsh environments.

<http://www.exens-solutions.com/en>

FLEURET

Fleuret develops, manufactures and implements technical containers and MGSEs. Our range of products secure the handling and the integration of your sensitive parts.

<http://www.fleuret-toulouse.com/>

GAMASPACE

Gama is building sails for space, initially dragsails to deorbit spacecraft, and subsequently solar sails to enable deep space access.

<https://www.gamaspace.com/>

GIFAS

The French Aerospace Industries Association: 500 French companies from innovative startups to suppliers and world leader OEMs. We organize the Paris Air Show since 1908.

Supporting the French aerospace supply chain in France and abroad.

<https://www.gifas.fr/en>

GROUNDSPACE

CelesGuard: Real-time RF spectrum monitoring of satellite constellations—track activity, detect interference, and analyze operational patterns.

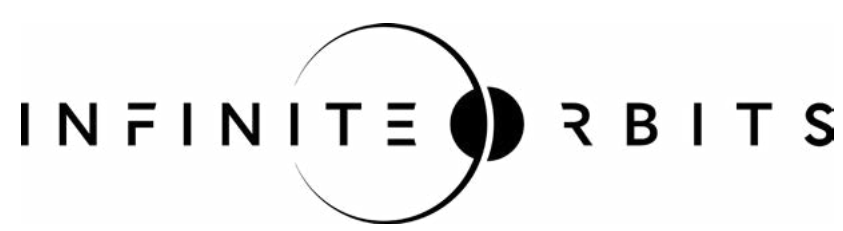

<https://www.groundspace.io/>

HSTAR

Non-dependent heavy launcher building the future of space access with Europe, America, and a global best-in-class commercial ecosystem.

<https://www.hstarspace.com/>

INFINITE ORBITS

INFINITE ORBITS offers SSA, inspection and life extension in-orbit services and develops its proprietary Rendezvous technology.

<https://www.infiniteorbits.io/>

ION-X

ION-X delivers high-performance electric propulsion for small satellites, enabling precise maneuvers, extended missions, and efficient space sustainability solutions.

<https://ion-x.space/>

LEANSPACE

The leading provider of Ground Segment solutions.

<https://leanspace.io/>

LOOK UP

360 ways to enable space | Look Up Space combines a global network of ground-based radars with an advanced digital platform to monitor and track objects in orbit.

<https://www.lookupspace.com/>

MAP SPACE COATINGS

MAP SPACE COATINGS provides surface coatings for launchers and satellites (design, production, and application service on-site).

https://www.map-coatings.com/en_US

OGS TECHNOLOGIES

Optical Stations for Telecom in Free Space.

<https://www.ogs-technologies.com/>

OSMOS X

OSMOS X is transforming space logistics with a reusable OTV that remains in orbit, autonomously capturing client satellites for repositioning, de-orbiting, and refueling.

<https://www.osmos-x.com/>

QAIRBON

We deliver validated & scientific industrial CO₂ emissions data & insights to help industry & Finance address the EU CO₂ regulatory challenges.

<https://qairbon.com>

RZE

I help companies and start-ups in their commercial event strategies and ensure logistical and financial following.

<https://www.rolandzellerevenements.com/>

SIMERA SENSE

Bringing cutting-edge optical technology for the NewSpace. We develop and manufacture cost-effective space proven payloads for Earth observation and SSA, making space more accessible than ever.

<https://sимерa-sense.com/>

SIRIUS SPACE SERVICES

Our mission: reliable, adaptable, and reusable launches for your satellites up to 1100 kg.

<https://www.sirius-space.com/>

SODITECH

Our expertise, efficiency, and rigor empower you to achieve even your most ambitious goals.

<http://www.soditech.com/>

SPACE FOUNDERS

We believe in your idea as much as you. (maybe more)

<https://www.spacefounders.eu/>

Space
Network
Services

SPACE NETWORK SERVICES

Kaon GEO dual-use satellite series offer an affordable path to sovereign SATCOM and resilience and agility for government fleets.

<https://www.spacenetworkservices.eu/>

THRUSTME

THRUSTME

ThrustMe empowers satellite missions to achieve more while bringing sustainability – both economically and environmentally – to the space industry.

<https://www.thrustme.fr/>

VIPER RF FRANCE

Design and supply of next generation RF integrated solutions: custom MMICs, RFICs, RF front-ends.

<https://www.viper-rf.com/>
